

WE ARE NOT JUST

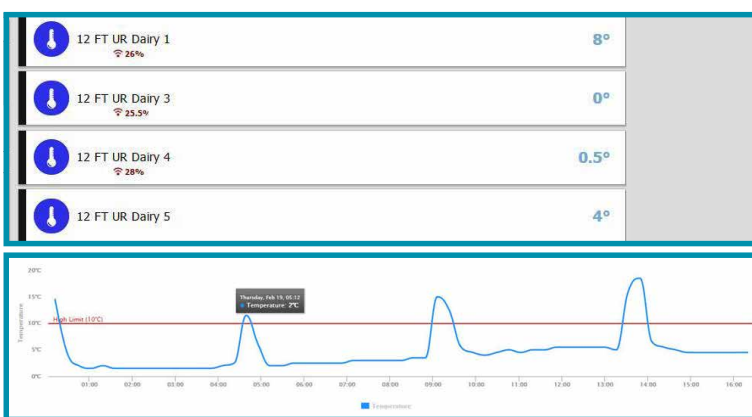

ANOTHER TEMPERATURE REPORTING SYSTEM

ECO

RETAIL MONITORING SOLUTIONS

WE TAKE ACTION WHERE OTHERS ONLY NOTIFY

REAL-TIME TEMPERATURE MONITORING + ALERTING

- Reports with actual temperature results
- Real-time, live temperature alerts and response
- Low cost wireless solution
- Historical data stored for audits
- Quick and simple installation
- Prevent damage and waste

WHAT MAKES OMEGA ECO DIFFERENT?

Omega Eco's Monitoring centre delivers value in three key ways: we ensure prompt, accurate diagnosis of alarms preventing perishable food loss, we reduce the maintenance cost of cabinets by optimizing service dispatches, and we enable advanced energy and operational analytics which can further reduce operating costs.

A typical supermarket has over R750 000 of meat, dairy, seafood and frozen foods in its cases at any one time. If refrigeration equipment fails and high-temperatures alarms are not being monitored, stores risk losing valuable merchandise as well as customer loyalty. Manually monitoring these alarms at store level requires significant employee attention as they must record case temperatures, investigate alarms, and request service dispatches when necessary. This process is imprecise, uncontrolled, and will lead to unnecessary food loss events.

By utilizing Omega Eco's monitoring centre to collect and manage alarms, a supermarket can avoid hundreds of thousands in labour and perishable shrink expenses every year. Our monitoring centre also provides historical alarm data which allows management to identify stores with unusually high alarm counts- a sure sign of an ill-maintained store- and target those stores for improvement.

MONITORING CENTER VALUE DRIVERS

1. Prevent food loss
2. Optimize service dispatches and maintenance
3. Enable advanced energy and operational analytics

CONTROL ROOM

Full Control Room monitoring 24 hours, 7 days a week

EVALUATION

Cabinet evaluation of parameters and corrective action

NOTIFICATIONS

Advanced alert notifications with follow-ups and escalation on no response

FEEDBACK

Control Room feedback and detailed monthly incident reports
